WORKPATH

Microsoft Teams Collaboration

View, update and communicate on your OKRs in Microsoft Teams and Planner

01 What is it?

This add-on is designed for Team Leads and their team members as well as Program Leads. It contains our Microsoft Teams native integration - allowing you to view, update and communicate on your goals and Initiatives in the tools where you are most active.

02 How will it help you?

Keeping OKRs top-of-mind during everyday work is often difficult. And we believe in making work easier. This is why we've extended our Microsoft Teams integration with new capabilities. With this add-on you can send messages to various audiences and empower teams to perform key actions around OKRs directly from within your day-to-day communication tool.

03 Which features are included?

- **OKR Overview** - View and update OKRs
- **Notifications** - Receive reminders to perform key actions from within the app
- **Cycle Megaphone** - Broadcast messages to selected audiences of the OKR process
- **Project Management** - Import Workpath Initiatives as MS Planner tasks

04 How to get access?

To add the MS Teams integration to your Workpath account, please reach out to your Customer Success Manager or via **upgrade@workpath.com**

*The pricing per user refers to the number of actual Workpath platform user licenses purchased by your company, not to viewer or analyst licenses. Example: If you hold an amount of 100 platform user licenses, the price for this add-on will total at 3€*100=300€ per month.
